Albany, New York 12208

Dear John:

I am a little embarrassed to be answering this at such a late date, but I better try to tell you that I have not been really able to come up with anything that could be useful to you -- rather than just leave it in limbo.

I am enclosing a brochure that describes the SUMEX resource, and you might use your own judgement on whether any of the attached projects might be more pertinent to your particular history and background.

Dave Garfinkel at Penn is another name that comes to mind, just because I just finished writing to him on another subject. I hope that something by way of better news did come up in the interval and am sorry that I just don't see anything in my own field of view that would be particularly helpful to you.

Sincerely yours,

Joshua Lederberg
Professor of Genetics
